2011 Four Regions Fastener Association Virtual Conference

A virtual conference was held for the Four Regions Fastener Association Meetup on November 17, 2021. The attendees included President Kin-Ming Cheung from Hong Kong Screw & Fastener Council, President Kang-Sheng Xue from the Fastener Subdivision of China General Machine Components Industry Association, President Tu-Chin Tsai from Taiwan Industrial Fasteners Institute, and President Hansung Jung from Korean Federation of Fasteners Industry Cooperatives.

The presidents exchanged the update of the industry amid the pandemic and reached the following consensus. The pandemic has thwarted the opportunity to meet up in person. The presidents should be able to hold a face-to-face conference at an appropriate time after the pandemic passes away, or hold an online meeting if necessary.

China General Machine Components Industry Association

CMCA to Hold Technical Innovation Award Receivers Selection & Awarding Ceremony

Combining industry characteristics, CMCA has held the Selection & Award Ceremony for Technical Innovation Award for ten consecutive years, utilizing the association's platform and promotion tools to discover and promote advanced technologies, good products and innovative teams.

The application for the award ended in 2021. The awarding ceremony will begin during the CMCA Members' Assembly in 2022.

CMCA Visits Guangdong Province to Inspect Local Industry Status

To better understand the development of high-end machine fastener industry in Guangdong Province, an inspection group from CMCA visited the Province. The guests accompanying the inspection group included personnel of fastener associations from Guangdong Province, Shenzhen City, Yangjiang City, and Dongguan City,

The conference for the inspection group was hosted by Guangdong Province Fastener Association. The Association introduced the concept and preparations for Guangdong Province Fastener Association to apply for establishing an exemplary high-end machine fastener industry. The Association said gaining this title will help corporations within the Province to develop and facilitate to draft an exemplary industry standard to create a good environment for the fastener industry in Guangdong.

Fastener Subdivision of CMCA

Held "Fastener Technology Forum" on November 11, 2021

The forum was held on November 11 in Zhejiang Province inviting industry experts to give reports and share their theses. The forum focused on: introduction to important standards for fasteners, fastener production and failure analyses, new surface treatment studies, nuclear and wind power studies, etc.

2021 ISO/TC2 International Fastener Standard Online Conference

The ISO/TC2 fastener technical committee and the subcommittees ISO/TC 2/SC11, ISO/TC2/SC12, and ISO/TC 2/SC13 held an international conference on October 18- 22, 2021. 50 representatives from 12 countries including China, Germany, U.S.A, France, Italy, UK, Japan, Switzerland, Sweden and Canada joined the meeting.

These years, China continued to send its representatives to international ISO meetings where they could express the requests and opinions for the Chinese fastener industry and exchange ideas with foreign experts to fully understand the making of international standards. ■
