FILETTI RIPORTATI

WIRE INSERTS

6

5.36

Materiale / material:

X10 Cr Ni 18-8

Rm: ≥ 1400 N/mm²

Durezza / hardness (Vickers):
425 HV

Rugosità / roughness:
circa 2,5 μ

Classe tolleranza filettatura /
thread tolerance class: 6h

Resistenza a temperatura /
temperature resistance:

425°C picco / short term;

325°C in continuo / long term

I filetti riportati sono costruiti in inox (**X 10 Cr Ni 18-8**) e vengono utilizzati per rinforzare o riparare tutti i tipi di foro. Particolarmente adatti per i materiali teneri (alluminio, magnesio), i filetti riportati sono resistenti al calore (fino a 425 °C per brevi periodi, oltre i 325° senza interruzioni), alla corrosione, agli agenti atmosferici e alle sollecitazioni meccaniche.

Vengono utilizzati in diversi settori (ferroviario, meccanico, militare, elettronico, automobilistico, aerospaziale). E' possibile trattare superficialmente i filetti riportati con lubrificanti a secco, zincature o argentature.

E' disponibile inoltre una versione colorata di verde che rende più visibile la presenza del filetto riportato all'interno dei fori delle basi di alluminio.

Compatibili con la DIN 8140.

Il filetto riportato consente alla vite di distribuire le tensioni di avvitatura su un numero maggiore di filetti. Questo consente di ottenere coppie di chiusura più elevate rispetto ad un accoppiamento tradizionale.

Wire inserts are made in stainless steel (X 10 Cr Ni 18-8) and are used to reinforce or repair all types of tappings.

Particularly suitable for soft materials (aluminium, magnesium), wire inserts are highly resistant to heat (up to 425°C for a short period of time and up to 325°C without interruption), to corrosion, to atmospheric conditions and to mechanical strains. They are used in different areas (railway, mechanics, armament, electronics, automotive industry, aerospace). Possible coatings: dry lubricants, zinc plating, silver plating. Wire inserts can be delivered in green colour that makes the thread visible to the eye when it's inserted in aluminium tappings.

Comply with the DIN 8140.

The wire insert allows the screw to distribute the tightening tensions over an increased number of threads offering higher tightening torques than other traditional joining systems.

Siccome il diametro originale dei filetti riportati è più largo del foro nel quale viene inserito, **è impossibile svitarlo.**

*As its original diameter is larger than the one of the tapping which receives it, **It is impossible to unscrew.***

Il filo in inox di sezione diamantata ha una **resistenza alla trazione di 1400 N/mm².**

Diamond-sectioned stainless steel rolled wired with a 1400 N/mm² tensile strength.

“Versione autobloccante”

La versione autobloccante dei filetti riportati presenta una o più spire di forma poligonale che esercitando una pressione sulle pareti del foro filettato, rendono impossibile lo svitamento della vite.

La versione autobloccante viene fornita colorata di rosso.

“Self locking version”

Self locking version of thread insert presents one or more deformed polygon shaped turns which exert pressure on the thread walls thus it makes it impossible to unscrew.

The self locking version is in red color.

VANTAGGI ADVANTAGES	E' il maschio più comune usato in particolare per maschiature eseguite manualmente. <i>Commonly used especially for manual tapping.</i>	Da usare prima del maschio finitore in materiali duri. <i>It must be used before finishing tap in hard materials.</i>	Da usare dopo il maschio sgrossatore. <i>It must be used after undersized tap.</i>	Grazie ad un particolare profilo del maschio, i trucioli vengono spinti fuori dal foro. <i>With its carefully designed profile, chips can be pushed out of the open ended hole.</i>	Ideale per fori ciechi. I trucioli di lavorazione escono dal foro. <i>Ideal for blind holes. This tap extracts chips from the hole.</i>

MONOKIT

Il Monokit contiene:

fino a M14

1 maschio - 1 attrezzo di posa manuale
10 filetti lunghezza 1.5 il diametro (M3-M10)
oppure 5 filetti lunghezza
1.5 il diametro (M11-M14)
e 1 troncatore manuale fino a M12.

da M16 a M22

1 maschio - 1 attrezzo di posa manuale
5 filetti lunghezza 1.5 il diametro

Tool Kit content:

up to M14

1 thread insert tap - 1 inserting tool
10 thread inserts length 1.5 (M3-M10)
or 5 thread inserts length 1.5 (M11-M14)
and 1 break-off tool up to M12.

from M16 to M22

1 thread insert tap - 1 inserting tool
5 thread inserts length 1.5

BLISTER

Il kit in blister contiene:

1 maschio - 1 attrezzo di posa manuale
10 filetti lunghezza 1.5 il diametro (M3-M10)
oppure 5 filetti lunghezza
1.5 il diametro (M11-M14)
e 1 troncatore manuale fino a M12.

Blister Kit content:

1 thread insert tap - 1 inserting tool
10 thread inserts length 1.5 (M3-M10)
or 5 thread inserts length 1.5 (M11-M14)
and 1 break-off tool up to M12.

ATTREZZI DI POSA MANUALE COMPATIBILI CON TUTTI I FILETTI A RIPORTARE

*HAND-OPERATED TOOLS
SUITABLE FOR ALL WIRE INSERTS*

Compatibile con qualunque filetto riportato DIN 8140 e con filetti Fixi.
Compatible with all DIN 8140 wire inserts and Fixi wire inserts.

KIT DI RIPARAZIONE PER FILETTI RIPORTATI

REPAIR TOOL KIT FOR WIRE INSERTS

6

17.36

Il kit contiene:

- 1 maschio per filettare
- 1 attrezzo di posa manuale preparato per una misura, ma può essere anche utilizzato per le misure vicine
- 25 filetti riportati lunghezza 1,5 diametro
- o 10 filetti riportati lunghezza 1 diametro a seconda del kit
- 1 troncatore

Box content:

- 1 thread insert tap
- 1 inserting tool with a necked nose mounted in selected diameter, which can be adapted to adjacent dimensions,
- 25 threaded inserts length 1,5 diameter or 10 threaded inserts length 1 diameter (it depends on the kit)
- 1 break-off tool

FILETTI RIPORTATI IN NASTRI DI PLASTICA

PLASTIC STRIP FEED THREAD INSERTS

Per una posa più veloce. Consigliati per produzioni medio-alte.
Sicurezza di installare sempre la stessa misura.
Facile da maneggiare.

*For a faster installation. Recommended for medium-high productions.
Safety of always installing the same thread size.
Easy to handle.*
