

JINZHAOBO

# Best Choice for High Strength Steel Structure Fastening

## Beijing Jinzhaobo High Strength Fastener Co., Ltd.

Setting “Quality First and Honest Service” as its corporate policy and “100% Qualification Before Shipment” as its goal, Beijing Jinzhaobo High Strength Fastener Co., Ltd. has achieved record high sales in the supply of heavy-duty bolts, shear bolts, weld screws, and foundation bolts for years. Dedicated to China, Latin America, N. America, and Southeast Asian markets, Jinzhaobo not only reported steady growth in its annual revenue, but also made a significant progress in the improvement and upgrade of its facilities and software/hardware, including nearly 200 sets of machines and device for cold/hot forging, heat treatment, Dacromet, packaging, and hot-dip galvanizing as well as an independently operating laboratory. So far, its monthly capacity has reached the level of more than 2,000 tons.

### Globally Approved Mature Technique

Strict quality control and enhanced material traceability are both key factors for Jinzhaobo to gain full trust from customers. After it acquired the self-export permit in 2006, it was also awarded the honor of “Excellent Products of the Industry” with its “JN” branded products. Furthermore, it has been also approved by DNV ISO9000, CE, welding, SGS factory, FPC, and many other certifications. The quality of its products has been also recognized by China Quality Certification Centre.

“Our biggest competitive edge is that we continue to focus on certain markets over the past 2 decades and explore technology/markets/professional talents/lean manufacturing/R&D in this segment, which allow us to continually maintain our leading position in the industry.

Mature technique, stable quality, and efficient delivery are our goals. We hope that we can become the world’s most competitive solutions and products provider for steel structure fastening,” said Jinzhaobo Manager Gavin Hao.

Well-known for its profession, brand, and scale production, Beijing Jinzhaobo has accumulated quite mature manufacturing technique for products that are compliant with U.S. A325/A325TC, European EN14399/EN15048, JISB1186, and AS1252 standards. In order to respond to broader market applications in the future, it has recently collaborated with upstream and downstream partners and has successfully developed a bolt for steel structure made from weather resistant steel type 3. It has been also dedicated to the continual optimization of customer structure, advancement of product level, shortening lead times, and increasing market shares.

Manager Hao added, “Although the global pandemic remains severe and the risk of more volatile fluctuations of raw material prices and surging freight costs continue to devour profit gain, Jinzhaobo still reports a gradual increase in its entire order volume. In 2022 we’ll continue to keep good quality control and on-time delivery to get over current challenges together with our customers and suppliers. We’ll also further reinforce our internal management with scientific methods and introduce lean manufacturing in order to create an organization that responds fast and produces efficiently and make our contribution to the construction of safer and higher-performance steel structures desired by people around the world.”
