## **Not Just Good But Better!**

## **GRAND METAL Meets Fastening Requirements with Craftsmanship**

好还要更好! 听艺五金以工匠精神满足紧固性能要求

"Not only meeting standards, but also excellence" is the deep impression that Dongguan Grand Metal Company Limited, China's leading supplier of self-clinching fasteners, nuts, screws and studs, has left in its customers' minds for over 2 decades. With the accumulation of mature OEM production and rich customer service experience, Grand Metal not only specializes in OEM production of standard products, but also possesses strong in-house R&D capabilities for standard parts. In the field of self-clinching parts development it has been in the forefront of the industry for years and its sale this year has even grown significantly by more than 20%.

In order to let each customer find the most suitable fastening solution, Grand Metal employs German consultants to assist in refining welding performance and optimizing product design, and also classifies the product specifications for various applications with different sheet metal thicknesses according to the industry and int'l standards. With the spirit of no compromise on details and extreme performance like a top "craftsman", Grand Metal always provides products exceeding customers' expectations and requirements in terms of application and performance.

"We have 4 workshops handling nuts, screws, machining and assembly. Our products include M3-M16 metric items and a growing range of imperial products, mainly supplied to sheet metal stamping customers, trade & distribution companies and global markets. Currently, our capacity is up to 5 million self-clinching parts a day," said General Manager Jason Zhu of Grand Metal.

Although the quality of its products is already in compliance with IATF 16949, Grand Metal continues to make breakthroughs in automotive applications (e.g. surface treatment like GEOMET321, Zinc-Nickel alloys, etc.). Its staff has also attended Product Safety and Compliance Representative (PSCR) courses and successfully obtained certificates issued by SGS, fully demonstrating their commitment to providing high quality products to customers.

In order to cope with future new trade regulations, Zhu revealed that the company is also planning to set up a joint venture in Malaysia in 2024, hoping to provide better services to global customers. He added, "Developing more markets and establishing partnerships are our plans for 2024. We hope to achieve a more balanced layout in different markets and realize a growth target of more than 10%."
