

Hebei Chaoyue Standard Fastener Mould

Craftsmanship Drives Global Second Punch Die Exports

河北超跃标准件模具
匠心铸就，二冲模出海全球

Hebei Chaoyue Standard Fastener Mould Co., Ltd. (below referred to as "Chaoyue") was founded in 2008 and is located in Renqiu, Cangzhou of Hebei Province—conveniently near Beijing. From the outset, the company targeted bottlenecks in the second punch die market, focusing on boosting product competitiveness. Guided by its core philosophy—"Talent

first, quality as the foundation, win-win partnerships, and customers above all"—this ethos permeates every aspect of operations. The facility spans 7,200 square meters and features advanced CNC machining equipment, vacuum heat treatment and coating equipment, manufacturing space, and quality inspection departments. A computer dashboard system provides real-time monitoring of production processes and quality control, ensuring on-time delivery and consistently reliable products.

Chaoyue's main products are screw and bolt dies, with a strong emphasis on second punch (header punch), carbide dies (heading die), and thread rolling dies. The lineup also includes wire drawing dies, punch pins, and trimming dies, offering one-stop purchase and custom development services. Its second punches stand out for superior wear resistance, high precision, and extended lifespan, which help customers cut costs. The comprehensive one-stop service—from new product design and development to rapid customization—has earned widespread market acclaim!

Deeply rooted in China, Chaoyue is aggressively expanding overseas by exporting to Southeast Asia, Central Asia, Southern Europe, etc. With China's exports on the rise in recent years, Chaoyue has ramped up its global deployment through trade shows, field marketing, industry publications, and online marketing. These multi-channel efforts have steadily boosted its market share.

Looking ahead, Chaoyue is doubling down on new product development, tailoring dies to customer needs and providing robust technical support. It is actively pursuing overseas investments and factory setups to bring high-quality products and service to the world, elevating brand value. It welcomes screw manufacturers and die buyers to collaborate for mutual success!
