

Quick Glance at Quality Suppliers at

# Düsseldorf Wire 2014

Compiled by Fastener World Inc.

## ACCUVISION TECHNOLOGY INC.

Stand no.:  
**15B14**

Auto optical & eddy current sorting machine, professional fastener inspection machines, which are suitable for solving the quality inspection problems of delicate screws, nuts, rods, micro parts, general fasteners, auto parts, and precise semiconductor parts. High speed high accuracy/100% inspection/360 degree crack inspection/Hardness inspection/Material mix checking/Thread defect inspection.

## BILWINCO

Stand no.:  
**15C24**

BILWINCO has been supplying heavy-duty, high-performance weighing, counting and packaging systems designed for handling any kind of fastener since 1955. As the only supplier in the business we develop our own weighers, controls and software. This makes BILWINCO the perfect worldwide partner for manufacturers looking for unique solutions custom-made for their special needs.

## BRANKAMP GMBH

Stand no.:  
**15H35**

"Trial and error" is a thing of the past - today's world demands "automatic optimization." Automated and efficient production are the key to success. This also applies to the thread roller sector: By using the automatic adjusting aid, Adaptive Die Match from Brankamp and E.W. Menn, the track is always ideally adjusted throughout the entire production process.

## CHENG I WIRE MACHINERY CO., LTD.

Stand no.:  
**11J06**

ad at p.313

SCWD-600T Straight Line Drawing machine is equipped with Siemens advanced human-machine interface control. Siemens control software is designed and planned by highly experienced control engineers. The controller is designed for upgrading operational convenience and efficiency. The drawing drums are manufactured from ductile cast iron, tempered for stress relief and are deformation-free with tungsten carbide plated for wire drawing zone and then precision ground.

## CHI NING CO., LTD.

Stand no.:  
**15E16**

Chi Ning Company was established in 1981 and has gained a very high reputation in cold forged tooling and nuts. Our product line includes tooling supplies, special nut tooling design, technical support, and excellent after sales service. By providing high quality products, reasonable prices, and prompt delivery, Chi Ning will be your best choice.

## CHIEN TSAI MACHINERY ENTERPRISE CO., LTD.

**Stand no.:**  
**15B24-06**

ad at p.309

CTR8N is a fastener thread rolling & forming machine. Its available diameter ranges between M4-M8 and the speed can achieve 200pcs per min. For environmental protection, the machine oil and diesel are used separately in the equipment with over 95% of isolation rate.

## CHUN ZU MACHINERY IND. CO., LTD.

**Stand no.:**  
**15D51**

ad at p.302

6-Station bolt-parts former with ergonomic design cover; cooling pipe automatically raises up and sets down; economic touch tone monitor setting; hydraulic wire feeding stand, etc which can be displaced upon your presence at Chun Zu booth.

## GEM INTERNATIONAL CO., LTD.

**Stand no.:**  
**15C46**

Linear screw/nut optical sorting machine. Multiple function: sort screws/nuts. Change screw size without changing molds. Never damages screws. Qualified parts, defective parts are all expelled by air pressure. Even if the machine breaks down, defective parts will not fall into qualified product trough. Machine never misjudges. Wise software. Easy operation.

## JENN TAI MACHINERY ENTERPRISE CO., LTD.

**Stand no.:**  
**15H29**

ad at p.306

"CHEN TAI" (JENN TAI) - a Taiwan-based factory specializing in Vibratory Bowl Feeder for 29 years. With the best quality and R&D team, we are known as a feeder expert worldwide especially in the fastener industry. CHEN TAI can make your process work automatically and feed out one by one.

## JERN YAO ENTERPRISES CO., LTD.

**Stand no.:**  
**15B14**

ad at p.374

We are a manufacturer for cold forging machines including bolts formers, nuts formers and parts formers. We have outstanding reputation for high-level technology, quality, service and value in the fastener industry. Sales are about 250 machines yearly. We control all aspects of our products, including machine design, machine building, QC, R&D, sales and administration. We've sold 3000 machines to over 36 countries.

## KINGWIN PRECISION CO., LTD.

**Stand no.:**  
**15B51**

As an ISO 9001: 2000 registered company, Kingwin Precision is a manufacturer and distributor specialized in producing quality forming tools. Our manufacturing experience is built on decades of working with customers' requirements, and products range includes various types of punches, dies and machining parts. Please also surf [www.kingwin.tw](http://www.kingwin.tw) for more information.

## KONFU ENTERPRISE CO., LTD.

Stand no.:  
**15B24-08**

We supply screw forming tools

- Carbide heading tools • Recess headers • Punches and pins • Thread rolling dies • Customized parts

## METAL FORMING SYSTEMS, INC.

Stand no.:  
**15G11**

Metal Forming Systems, Inc. develops and supplies software for forming process design and validation. Our software products include NAGFORM for Design of Forging Sequences. NAGFORM is a unique program for determining forming sequence for cold or hot forged parts. Our other product, NAGSIM.2D / NAGSIM.3D are FEA forging simulation programs for simulating cold, warm and hot forging processes.

## SAN-YUNG ELECTRIC HEAT MACHINE CO., LTD.

Stand no.:  
**15B24-05**

San-Yung, established in Taiwan in 1970, is the biggest mesh belt type continuous furnace manufacturer in Asia and the best supplier of mesh belt type continuous furnaces for heat-treatment of fasteners. Many famous fastener companies have chosen continuous furnaces from San-Yung. Over 800 sets of mesh belt type continuous furnaces have been manufactured. San-Yung has the best experience and performance in offering the best service and heat-treatment technology for customers.

## MANASSERO & C. s.r.l.

Stand no.:  
**15D27**

At Wire 2014 we will introduce our quality used machines. We are one of the major fastener dealers in the world with 200 machines in stock. We specialize in European, American or Japanese machines: Sacma, Carlo Salvi, Nedschroef, Hatebur, E.W.Menn, Ingramatic, Nakashimada, Asahi Sunac, Sakamura, Streicher, etc. More info at [www.manassero.eu](http://www.manassero.eu)

## SAN SHING FASTECH CORP.

Stand no.:  
**15B24-04**

ad at p.2

At Tooling Division, our product range includes tooling for fastener production, hot forging, press production and task-specific parts, with applicable range from standard fastener industry and automotive industry to Aerospace industry. At Machinery Division, we are providing nut formers, nut tapping machines, nylon assembling machines, optical sorting machines and bolt measurement systems.

## SHENG CHYEAN ENTERPRISE CO., LTD.

Stand no.:  
**16F35**

ad at p.296

Combined Drawing Machines are integrated with the advantages of German and Japanese machines with the best quality parts and materials. We design machines with a higher grade of tolerance to increase durability. Faster processor units and software are used to ensure the machine's ease of use.

## SKAKO VIBRATION A/S

**Stand no.:**  
**15B04**

SKAKO VIBRATION – furnace feeding systems are a very important part of many industrial processes e.g. for the automatic and weight guaranteed belt- and tempering furnaces. Controlled, automatic and weight guaranteed feeding of bulk material ensures a steady product quality, and optimized efficiency of the downstream equipment of all kinds of bulk material.

## STAMPO ENTERPRISES CO., LTD.

**Stand no.:**  
**15A33**

ad at p.301

Our Bolt Parts Former is equipped with air clutch and inverter to enhance power of jog function, and universal transfer allowing complicated parts forming. It's able to equip optional devices for user-friendly operation, e.g., digital handwheel fine tuning movement, K.O. servo control, stopper servo control, adjustable PKO, conjugate cam design for over-speed performance, etc.

## TICHO INDUSTRIES LIMITED

**Stand no.:**  
**15B24-03**

Ticho's fastener tools have helped many small unknown factories develop into well-known high quality giants in the fastener sector. Now Ticho can help you as well to enhance your quality. Bring your fastener samples or drawings to Düsseldorf and meet us, we help you with the best tools. High precision and high tooling life are just the beginning of our excellent service. You are welcome to contact us – take the first step to success.

## UTA

**Stand no.:**  
**15B24-01**

Advanced Assembly Solution – In-line solution from feeding – assembly – optical sorting – counting – packing. Promote the delivery quality effectively. Over 30-year experience in fastener assembly machines. Dedicated to increasing your assembly efficiency with the minimum labor and maintenance. Assembly range is extensive and design complies with the CE directives. Please come to UTA for the diverse assembly methods.
