

GRAND RE-OPENING

Taiwan Suppliers to Show Strengths at 9 Int'l Expos

Interviewed/Edited by Fastener World

Since the 2nd half of 2022, the organizers of many influential domestic and foreign fastener, hardware, machinery, and components related tradeshows have successively confirmed to reopen their gates to welcome international exhibitors and buyers. Many companies have been also active in sending inquiries for the possibility of participation and promotion at int'l tradeshows to discover potential buyers in local markets and look for the most favorable collaboration opportunities. Over the past two years, the pandemic has greatly reduced the opportunities for companies to meet int'l buyers face to face. However, with the global industry gradually recovering to its last vibrant market scenario, it is now the best time for companies to demonstrate their latest products, promote brand awareness, and look for more buyers.

In the next couple of months, Fastener World Inc. will exhibit at **International Fastener Expo (IFE), Fastener Poland, Korea Metal Week, International Hardware Fair Cologne, Vietnam Wood, China International Hardware Show, Taiwan Hardware Show, Taiwan International Tools & Hardware Expo, and International Metal Technology Indonesia** and many other important industrial events to disseminate our publications for finding out the best shortcut to strengthening promotion and exposure of suppliers. As the exclusive booth sales agent of IFE and Fastener Poland in Taiwan, Fastener World will also bring Taiwanese exhibitors to exhibit and showcase their manufacturing technology and service strengths to foreign demanding industries.

FASTENER WORLD

Established in 1987, Fastener World Inc. is a world-renowned marketing media for fasteners, hardware, and industrial components industries. With a team of over 30 years of experience in offering the global industry the most effective marketing solutions and the combination of printed magazines, online B2B platform, representation of leading int'l trade shows, and instantaneous business info service, Fastener World provides the industry with diversified marketing approaches to promote their brand awareness and boost order intake.

Our publications include:

- **Fastener World Magazine Bimonthly Edition** (released every Jan/Mar/May/Jul/Sep) + **Fastener World Magazine Buyers' Guide** (released every Nov)
- **China Fastener World Magazine** (released every Feb/Jun/Oct)
- **Hardware & Fastener Components Magazine** (released every Feb/May/Aug/Oct)
- **Emerging Fastener Markets Magazine** (released every Aug)
- **Fastener World Europe Special Edition** (released every two years)

Our publication has a circulation of over 10,000 printed copies per issue sent to more than 200 countries and we participate in at least 25 int'l trade shows per year. We are also the exclusive sales agent in Taiwan of Fastener Fair Stuttgart, Fastener Fair India, Fastener Fair Mexico, Fastener Fair Turkey, International Fastener Expo, Fastener Poland, etc.

We continue to reinforce our service range, add more software/hardware investment, and create more solid competitiveness on the market for customers with the best service quality.

INTERNATIONAL FASTENER EXPO 2022

October 17-19, 2022
Mandalay Bay, Halls E & F
Las Vegas, NV

The International Fastener Expo (IFE) is the largest B2B expo for industrial fasteners and tooling & machinery in North America. Since 1981, the event has brought together the manufacturers and master distributors of fasteners, precision formed parts, fastener machinery & tooling and other related products and services with distributors and sales agents in the distribution chain.

Held annually in Las Vegas, Nevada, USA, the three-day event consists of an all-day conference program presented by endorsing fastener associations, a welcome reception, a golf tournament, and a show floor with hundreds of exhibitors from around the world.

Each year, thousands of attendees from 30+ countries travel to North America's #1 fastener trade show to network and do businesses with hundreds of suppliers, showcasing every type of fasteners for the industrial, construction, aerospace, and automotive industry and much more. From industrial to construction, electronic to automotive and aerospace, this is the trade show where all types of distributors come to network and see customers, build new relationships, and find new products.

Additionally, we provide awards for the industry's Hall of Fame and Young Fastener Professional recipients. The Hall of Fame and Young Fastener Professional of the Year Awards recognize those who have made lasting inputs to the fastener industry on a national or global scale, and leaders, 40 years old or younger, who already have a record of integrity and respect in the industry.

JC GRAND

**Excellent Fastener
Manufacturing &
Service Since 1978**

JC Grand is a leading manufacturer and exporter of industrial fasteners and metal hardware components. Since 1978, JC Grand has been serving customers globally with an extensive line of high quality screws, nuts, bolts, washers, anchors, and customized hardware products from its wholly-owned factories in Taiwan and China. All of its locations are ISO 9001 certified, and singularly focused on delivering products and services of exceptionally consistent quality to its clients worldwide.

Certified Facilities and Full-Fledged Capabilities

The company consists of a main office in Taipei, three ISO-9001 and IATF-16949 certified production facilities in Kaohsiung, Taiwan, and an 800,000 square feet vertically-integrated factory in Zhejiang, China, all connected and managed by the same SAP ERP system. In addition, JC Grand owns and operates an A2LA certified (ISO-17025) mechanical testing laboratory in Kaohsiung. Technical staff and internal production covers fastener design, cold heading, self-drilling point forming, continuous line heat treatment (neutral, carburizing and carbo-nitriding), optical and roller sorting, washer assembly, custom packaging and logistics.

New Surface Coating Factory Opened

As of 2022, JC Grand has opened and is currently operating a new, surface coating factory in Kaohsiung focused on the prevention of fastener corrosion in severe outdoor environments. This facility has two principal workflows and equipment: the base coating cold welds, diffuses and seals proprietary multi-metal powders onto the fastener substrate, and the other applies thermoset organic topcoats and friction modifiers on top of the base coat via automated dip-spin lines.

It dispatches more than 300 containers (4500+ tons) of fasteners every month to over forty countries and employ more than 300 sales and factory personnel. It is equipped to produce both standard and customized fasteners that meet all industrial requirements.

Worldwide Service for Various Industrial Demands

Whether you are an industrial manufacturer, OEM or wholesale distributor, professional contractor supplier, or retail-focused operation, it understands your needs and has the experience and capability to consistently meet them. Its goal is to establish and maintain a long-term, mutually-beneficial relationship with its customers, and to provide a level of service that exceeds expectations.

MAC PRECISION HARDWARE

Sales Up in 2022 Amid Headwinds

Consolidating a Firm Market Presence with Excellent Quality and Advantageous Prices

The whole world is struggling to get rid of the influences of Covid-19, inflationary crises, and a great slump in consumption, which also influence the production and sales of industrial components. With such a market scenario full of unfavorable factors, Mac Precision Hardware still reached record-high export and sales results in the first half of 2022. The excellent quality, advantageous prices, and topnotch customer services are all undefeatable strengths of Mac Precision to continuously achieve great success in every competition on the market.

Mac Precision Hardware shows the advantage of owning manufacturing plants in both Taiwan and China and it also continues to introduce new CNC machines into its plants. In order to respond to customers' high-standard requirements for customization, Mac Precision Hardware not only focuses on the optimization of its manufacturing procedures to reduce relevant costs, but also has purchased two sets of optical sorting machines recently to ensure the best quality control of products for customers.

More Than 50% of Its Products are Supplied to Automotive Industries CNC Components will be the Main Focus of Future Development

In addition to supplying to the electronics, machinery, and medical applications, Mac Hardware Precision also has more than 50% of its products supplied to automotive industries. With the global automotive industries gradually switching their focus to electric vehicles, the application of CNC components on automobiles will undoubtedly appear a significant revolution.

"Our team has been aware of this trend for long. As a result, in recent years we have started to collaborate with electric vehicle customers in Europe and the U.S. in the research and development of wire harness connectors, charging device plugs, and many other CNC parts, which will continue to be the focus of our future development," according to General Manager Michael Chang of Mac Hardware.

With the great efforts of all team members, customers of Mac Hardware demonstrate high loyalty and its capacity has been also fully booked through the end of this year. General Manager Chang noted, "For a company dedicated to OEM production, quality, prices, and services are always where the core competitive edge for the development of a company is generated from. Mac Hardware will continue to work with associate plants to satisfy all customers' needs and provide the most incomparable service to win the trust of more customers."

FONG YIEN to Develop U.S. Market

With ASME B18.15 Shoulder Eye Bolt *by Gang Hao Chang, Vice Editor-in-Chief of Fastener World*

Specialized in manufacturing DIN 444 eyebolts, JIS B1168/1169 shoulder eye bolts & nuts, special eyebolts, and special cold/hot forged

fasteners, Fong Yien Industrial Co., Ltd. founded in 1974 has a wealth of experience in cold/hot forging technology. With its excellent quality and relatively reasonable prices, Fong Yien has consolidated a firm presence in the competitive market and continuously received orders from many European and Japanese customers for over 40 years. In 2020, it activated an ASME B18.15 shoulder eye bolt manufacturing plan in order to expand its product range and business activities in key global demand markets, particularly in the U.S. market.

Self-Owned Brand Plus Local Inventory

U.S. trade war and tariffs against China have forced U.S. purchasers to look for more purchasing sources. At International Fastener Expo this year, Fong Yien with abundant manufacturing experience in JIS-compliant products will showcase its latest shoulder eye bolts to demonstrate the professional technique of product development and the strong ability to satisfy various customers' demands of Taiwanese suppliers.

"More than two years of the rampant pandemic has changed buyers' habits a lot. Thus far, the U.S. market represents only less than 5% of our total sales, which offers significant potential for us to grow in the future. As a result, we hope to make the most of our successful collaboration with our EU and Japanese customers and the participation in IFE this year to make our market share bigger and find a way for us to win in the fierce competition. In addition to the current sales through existing distributors' approaches, our utilization of B2C and B2B platforms has also appeared preliminarily effective results in the expansion of e-commerce approaches. In the U.S. we also have our own warehouses and have products of our own brand sold on Amazon.com, receiving many enthusiastic feedbacks from buyers in the market," said Fong Yien sales manager Wes Chuang.

Adopting CNC Machines

Hot Forging and Secondary Processing at One Go

Although Fong Yien is not as big as other century-old brands in Europe and USA in terms of scale, it is one of the few companies in the market having both hot forging and secondary processing equipment. Different from other industry counterparts, Fong Yien introduced sets of CNC machines, enabling it to achieve precision control over secondary processing quality and better precision and surface roughness of finished products than other industry counterparts. Due to remarkable quality, it has even tapped into the motor manufacturing and rigs industries with strict quality requirements for shoulder eye bolts, from which other Chinese counterparts still cannot win any order.

Chuang said, "Shoulder eye bolts are mainly used to hang heavy machines and objects, so their load-bearing capacity and safety coefficient are greatly valued. We're not only equipped with enough quality inspection ability, but also have passed the test of an U.S. laboratory designated by our customer. Customers can rest assured to place their orders to us. Under the emerging global purchasing trend of not putting all eggs into one basket, Fong Yien offering excellent quality, relatively reasonable prices and stable supply is definitely your best choice."

Punches & Dies by

FRATOM FASTECH

Market-Overwhelming Superior Technology

by Gang Hao Chang,
Vice Editor-in-Chief of Fastener World

With more than 25 years of knowledge and background in punch & die manufacturing, FRATOM FASTECH based in Kaohsiung (Taiwan) looks globally and specializes in production and export of high-precision metal cold/hot forming punches and dies. For years, it has been one of the first choices of global fastener manufacturers in pursuit of high product quality and manufacturing efficiency when looking for comprehensive punch & die solution.

Its main products include: hot forming tools, punches and sleeves, dies, machinery accessories (transport fingers & grippers, feed rollers, other spare parts), Go/No Go gauges, concentricity gauges, head thickness measuring equipment and KEMNO cold forming lubricants. Adhering to the principles of improving excellent quality, fast shipment and providing competitive prices, as well as the desire to become the most trusted partner of its customers, FRATOM has established long-term partnerships with a number of int'l fastener manufacturers and tooling agents to jointly create high-quality professional production lines to serve customers' needs for various tooling and molds.

Multiple Punches to be Showcased at IFE 2022

In addition to being one of the world's most important fastener demand markets, the U.S. is also a hotspot for many manufacturers with advanced fastener manufacturing technology. At IFE this year, FRATOM will showcase its latest products, such as (round pins/hex/six-lobe/12-point) carbide punches, recess punches, sleeves, transport fingers & grippers, machinery accessories, tooling dies, die boxes and inserts to meet the huge demand for tooling and peripherals of fastener manufacturers.

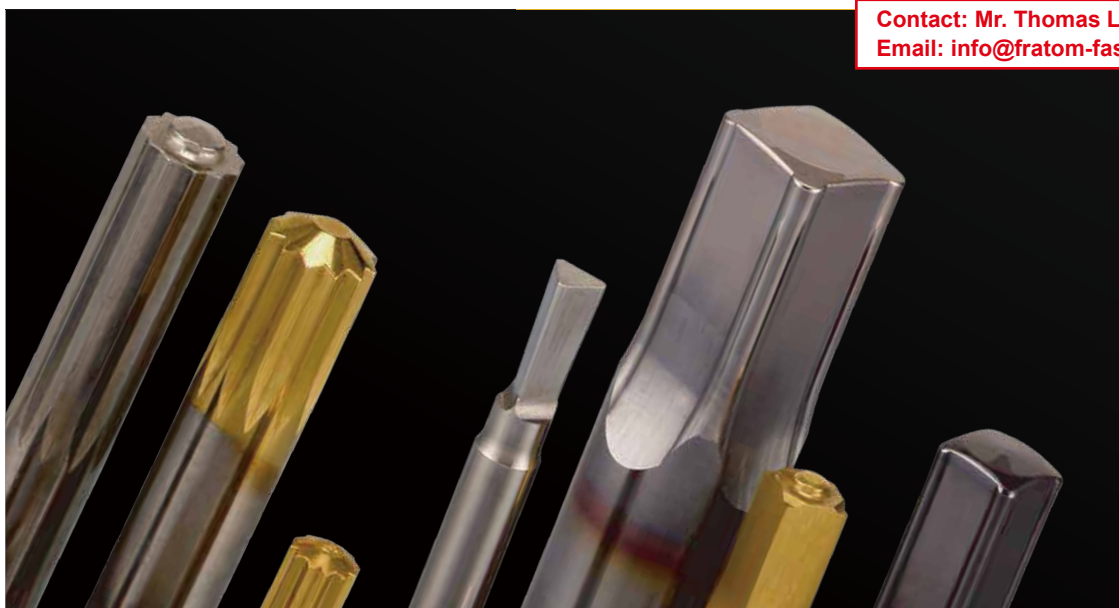

"Our tungsten carbide punches and mirror polishing technology is excellent, and the surface roughness can even reach the level of Ra0.01 (generally, other industry peers can only achieve Ra0.1). At present, most of our products are directly sold to the European and American markets and are adopted by the majority of automobile and motorcycle, aerospace and medical fastener manufacturers. Our major clients in Europe are mostly from Italy and Germany, and the U.S. market even accounts for 20% of our sales. We hope to expand our presence in the U.S. market by participating in IFE this year and further develop the potential fastener manufacturing hot zone," according to FRATOM.

Being always honest in collaboration with customers and having been certified to ISO 9001 and ISO 14001 certification, FRATOM only uses materials with stable quality and introduces a complete range of quality control equipment to strictly control the quality and dimension of each product. On the other hand, faster quotation time, relatively quicker delivery, customized services and the ability to assist customers in solving problems are the biggest competitive advantages of FRATOM.

"This is our first participation in IFE. We hope that through this exhibition opportunity, we can establish more interaction with local customers in the U.S. and understand customer needs. We look forward to seeing you all at the show," said FRATOM.

High Quality Fasteners by **SOON PORT**

Helping Customers Obtain ICC Certification

by Gang Hao Chang,
Vice Editor-in-Chief of Fastener World

Founded in 1962, SOON PORT INTERNATIONAL is one of the leading fastener manufacturers in Taiwan with a history of more than 5 decades, and its main business in the early years was wire processing and hardware/screw wire. With years

of experience and technique, it expanded its business into hardware, nails, and screws manufacturing in 1990. Currently, its main products in the fastener category include drywall screws, machine screws, self-tapping screws, gardening screws, cabinet screws, structural screws, etc. With the diversified production capability across wire and fasteners, SOON PORT is able to meet the ever-changing needs of customers in the fastener industry worldwide.

One-Stop Operation from Raw Materials to Finished Products

“Focusing on Quality” and “Customer Satisfaction” have been the two most important corporate management principles for SOON PORT when it comes to customer service. Even though it offers a wide range of products, it has been adhering to the only principle of no compromise over quality for years. With the one-stop operation from raw materials to finished products, the latest manufacturing technology/equipment and the efforts of all staff, SOON PORT has been recognized as a professional fastener manufacturer and exporter by many overseas customers.

“In terms of production, we have factories for wire processing, screw forming, and packaging, have a quality assurance room equipped with a variety of professional instruments, and have inspection standards

for each important process to strictly control the quality of production. In terms of service, we have a professional team specifically for customers’ product development, specification discussions, custom product design, and solving problems related to production processes. We have a high level of customer satisfaction due to our ability to respond quickly to customers’ questions and communicate with them effectively and immediately,” according to SOON PORT.

Developing Products with Customers Customized Screws Receive Great Reviews

SOON PORT’s fasteners are mainly sold to the construction customers in the U.S., German and Spanish markets. The U.S. market well-noted for stringent quality requirements, in particular, accounts for about 35% of its total sales. Among the fasteners supplied by SOON PORT, customized screws are the main focus of its development collaboration with customers, and it has even assisted customers in developing products to obtain ICC certification in the U.S. It has also obtained ISO 9001, ISO 14001 and CE quality management certification, demonstrating its excellent ability to produce fasteners that meet the requirements of international standards.

Once exhibiting at Fastener Expo Shanghai and Fastener Fair Stuttgart and receiving many buyers’ positive feedback, SOON PORT will participate in IFE again this year. “We are looking forward to developing more new customers and maintaining close relationships with our existing customers through this unique opportunity. In the future, we will also continue to participate in international exhibitions to enhance the visibility of our brand and let more overseas customers experience our quality products and services,” said SOON PORT.

SINTEC CO., LTD.

SINTEC Patent-Pending Concrete Bolt

by Gang Hao Chang, Vice Editor-in-Chief of Fastener World

As one of the professional fastener manufacturers in Taiwan, SINTEC has been committed to providing a variety of high-quality fasteners for global industrial customers since it was established 10 years ago.

Its main product supply focuses on construction screws, drywall screws, roofing screws, window screws, decking screws, concrete screws/bolts, and so on. In addition to having the latest testing equipment to ensure strict quality control of products, the manufacturing procedures of products it supplies also fully comply with the requirements of ISO9001:2015 and the EU CE certification.

Among so many fastener manufacturers in Taiwan that have been in business for 30-40 years, SINTEC has a relatively short history of establishment, but with its professional team's extensive knowledge of fastener products and in-depth understanding of the entire supply chain from raw materials for fasteners, product design and processing to the final packaging and shipment, it has secured many long-term overseas orders for itself.

New Product: SINTEC Concrete Bolt

SINTEC has gained a strong presence in the UK and Japanese markets for years and has a large and loyal customer base. This year, it will participate in IFE to further expand its presence in the U.S. and the greater American market. At the show this year, SINTEC will not only showcase its well-received fasteners for the construction hardware, machinery and furniture industries (incl. C2 Screw for Furniture, C Type Coil Screw, Stainless Index Roofing Screws), but also introduce the newly designed SINTEC concrete bolt series to the visitors. The new SINTEC concrete bolt series is also expected to be a major attraction at the show.

“The design of the SINTEC concrete bolt series has three distinctive features,” according to SINTEC. “First, the thread diameter of the hexagon head of the anchor is larger than that of the anchor and it has under-head serrations. During installation, the threads of the anchor bolt cut into the concrete along the hole and create firm engagement with the base material. Second, the drill bit and head recess design reduce the installation time. Third, the installation is simple (no torque setting is required), making the anchoring effect more reliable. At present, this product has been applied for certification by the EU ETA and the US ICC.”

Systematic and Efficient Quality Control Policies

Providing quality product services and meeting customer needs is SINTEC's consistent quality control strategy. Under such a business principle, SINTEC constantly and actively improves its quality management system and creates a more systematic and efficient operation management system, thereby improving product quality and providing customers with satisfying quality services.

“Our competitive advantages include the ability to communicate completely with our customers, a complete product supply chain, and the ability to produce by our own and ensure good quality control from raw materials to finished products. In the future, with Europe and the U.S. gradually loosening their border control policies, we also hope to help distributors build brands and expand their product portfolios, and more importantly, provide professional products that best fit the needs of our customers,” said SINTEC.

**FASTENER
POLAND®**

19-20 October 2022, Krakow, Poland

5th International Trade Fair
for Fastener and Fixing Technology

International Trade Fair of Fastener and Fixing Technology FASTENER POLAND will take place on 19 -20 October 2022 at EXPO Krakow in Poland. FASTENER POLAND® is a convenient space for decision-makers, engineers and purchasing professionals from key manufacturing sectors to meet with leading fastener manufacturers from around the world. The show provides insight into industry trends and provides key information on the latest developments in the fastener and fastenings sector. For exhibitors, participation in FASTENER POLAND® is an excellent opportunity to reach thousands of specialists in the same place and time and to present innovative solutions, which translates into: strengthening market position, brand recognition and, most importantly, maximising profits while saving time and money. Poland has huge potential for growth in terms of fasteners. Because of COVID and problems with availability, lots of European production companies have moved into Central European countries, and with them comes demand for fasteners. Poland is the biggest winner from this change. Now what is more important is not just-in-time logistics, but also just-in-case. Poland has a good tradition in production, a skilled workforce and reasonable production costs. Production of fasteners is in 3rd place in the EU and still growing. During FASTENER POLAND®,

exhibitors have the opportunity to meet with their clients and find new potential ones. Polish companies take advantage of the fact that a lot of foreign guests come to the fair. On the other hand, foreign companies have the opportunity to meet all the most important representatives of the Polish fasteners industry in person in one place. The last edition in 2019 attracted 210 exhibitors, 72% of which were foreign companies from China, the Czech Republic, France, the Netherlands, India, Malta, Germany, Slovenia, Turkey, Taiwan, Great Britain and Italy. The fair was visited by 4,093 industry guests, 43% of which were guests from 44 countries. The TOP 5 included Ukraine, the Czech Republic, Slovakia, Italy, Germany.

The novelty of this year's edition of FASTENER POLAND will be B2B meetings, which will take place in the form of a hybrid. On October 19-20, 2022, cooperation meetings will accompany the FASTENER POLAND trade fair in the meeting rooms of EXPO Krakow, and after their end, they will move to a virtual space.

The deadline for submitting participation in the fair is September 20, 2022. All interested companies should contact Fastener World by phone: +886-6-2954000 or by e-mail: foreign@fastener-world.com.tw
