

# Specialized OEM and Mass-producer of CNC Machined Parts

## Da Hong Precision Co., Ltd.

專業代工與量產CNC精密五金零件-達鉸精密有限公司 *by Dean Tseng, Fastener World*

The sound of machines rumbling was heard afar as I arrived at Da Hong Precision's plant in Xigang District of Tainan City. Aligned in the manufacturing area were 7 CNC machine tools and more than 10 conventional lathes running at full capacity. The owner of Da Hong Precision was operating one of the CNC machine tools. He was operating the machines with his employees and attentively manufacturing parts for clients. The company had been busy manufacturing even on the day of the interview. The owner said he had just received an order from another new client. This company has had 43 years of history since its founding in 1977. The current owner (successor) has been working in the CNC machining industry for more than 20 years and he is a professional of parts OEM and mass-production.

### It All Started with Set Screws Extending to Precision Parts

The owner said his predecessor started off manufacturing set screws which the company continues to supply today. The set screws are

especially suited for use with electronics. They are high in precision and quality and are highly rated by users. In response to market competition and demand, the company extended from set screws to diverse precision parts which are mass-produced with made-in-Japan CNC machine tools and conventional lathes in the plant. Through traders, the company serves overseas customers and supplies CNC machined parts to the electronics and automotive industries. Besides traders, it works with Taiwanese partners to manufacture and machine parts for Taiwanese customers who export those parts. "Most of our products are eventually supplied to overseas customers through traders and export-oriented customers in Taiwan," said the owner.

### Thorough Evaluation & Adequate Communication, Production as per Drawings

Despite 20 years of experience, the owner continues day after day to dive in the knowhow of CNC machine tools that forms his specialty and adherence to quality. He gives it all to meet the requirements specified in drawings provided by customers and traders. He has taken orders for customized products before. For customized orders, he will ensure adequate communication and thorough evaluation prior to production as per customers' and traders' desired volumes.

### Promoting OEM Service / Increasing Target of Supply

Da Hong Precision is a family-owned business with a heritage in CNC machining. Passing down the hard work of his predecessors, the owner's objective now is to continue expanding and promoting his OEM service. He welcomes all traders and customers looking for OEMs and looks forward to serving more domestic and overseas customers.
