

CHIAO CHANG Riveters- 100% Developed & Made in Taiwan with Competitors-Outpacing Performance

喬章拉鋤工具 - 100% 台灣研製 性能大勝同業

Cordless
Riveter

Chiao Chang Pneumatic Tool Corp., a developer and manufacturer of industrial-grade pneumatic and power riveting tools, has had its products sold globally under its own “CCP” brand for 40+ years and has been also the designated OEM partner for many world-renowned tool manufacturers. It provides a wide range of pneumatic riveters and rivet nut tools, as well as power riveters to users in the aerospace, automotive, construction, sheet metal fabrication, and various thin sheet metal structural fastening industries demanding high-quality performance. The impressive durability of its products, combined with ergonomic, labor-saving designs and ease of maintenance & repair, has earned the company the favor and certification of major industry clients.

Patented in USA and Taiwan / Faster, Lighter, and More Durable

Chiao Chang insists that **all its products are developed and made in Taiwan**, refusing to follow the industry's practice of copying European & U.S. designs or engaging in cut-price competition. This approach ensures that the products' structure and design truly meet customer needs, while the company's strong R&D capabilities also enhance the products' durability.

Take its best-selling pneumatic riveters and rivet nut tools as examples: not only have they been qualified for **various patents in Taiwan and the U.S.**, but also feature **no oil leakage, 1.3 times faster riveting speed, a 15–20% reduction in weight, and 1.5 times greater durability**. The five series of power riveters have also secured seven U.S. patents and comply with the latest version of Regulation 62841.

“The ER-1 (6.4–3.2) cordless riveter **can pull 30,000 pcs of Ø6.4 (1/4”) structural rivets continuously without jamming**, and its mechanism remains in good working order without requiring replacement, producing no grating high-pitched noise. The ER-2 (4.8–2.4) cordless riveter dominates the industry with a rivet **feeding speed of just 1.2 seconds per cycle**, and likewise, it does not suffer from rivet jams or structural malfunctions requiring part replacement,” said Mr. Yu Tang Lin of Chiao Chang.

The ER-1+ cordless riveter capable of pulling over 30,000 pcs of rivets (6.4–2.4) of any material and the ER-1 PRO cordless riveter capable of pulling over 30,000 pcs of rivets (7.9–6.4) of any material, as well as the ER-lockbolt cordless lockbolt, which can pull Huck bolts of any material, all demonstrate exceptional quality.

Air Riveter

Made from Highly Durable Materials and Customizable as Per Request

With a deep understanding of the varying market needs of customers in different countries, Chiao Chang backed by 40 years of experience in the R&D and manufacturing of rivet tools offers customized solutions tailored to specific requirements. In addition to actively collaborating with domestic technical research institutions on R&D, the company begins with rigorous material selection, leverages the advantages of local production in Taiwan, and conducts extreme durability testing on every new product before shipment to verify its reliability, ensuring customers receive high-quality products they can trust.

Lin added, “Chiao Chang’s factory fully complies with the requirements of the ISO 9001 standard. Our pneumatic tools have passed the EU CE certification, and our power tools, batteries, and chargers have been also certified by TÜV Rheinland Taiwan, ensuring that our quality meets int’l standards. In the future, we’ll continue to participate in overseas trade shows in the fastener, hardware, and automotive sectors to actively enhance the CCP brand’s reputation for high quality and its int’l visibility.” ■
